Journal of Fluid Mechanics **Volume 354 10 January 1998**

A. V. Fedorov & W. K. Melville Nonlinear gravity–capillary waves with forcing and dissipation *page* 1

C. P. Lee, A. V. Anilkumar, A. B. Hmelo & T. G. Wang Equilibrium of liquid drops under the effects of rotation and acoustic flattening: results from USML-2 experiments in space 43

A. H. M. Eisenga, R. Verzicco & G. J. F. van Heijst Dynamics of a vortex ring moving perpendicularly to the axis of a rotating fluid 69

S. Narimousa Turbulent convection into a linearly stratified fluid: the generation of 'subsurface anticyclones' 101

G. Raman & R. Taghavi Coupling of twin rectangular supersonic jets 123

J. A. Nicolás, D. Rivas & J. M. Vega On the steady streaming flow due to high-frequency vibration in nearly inviscid liquid bridges 147

D. A. Briggs, J. H. Ferziger, J. R. Koseff & S. G. Monismith Turbulent mixing in a shear-free stably stratified two-layer fluid 175

V. V. Voronovich, D. E. Pelinovsky & V. I. Shrira On internal wave–shear flow resonance in shallow water 209

W.-T. Tsai A numerical study of the evolution and structure of a turbulent shear layer under a free surface 239

I. A. Eltayeb & E. A. Hamza Compositional convection in the presence of rotation 277

O. Bühler & M. E. McIntyre On non-dissipative wave–mean interactions in the atmosphere or oceans 301

W. J. Merryfield Effects of stratification on quasi-geostrophic inviscid equilibria 345

R. F. Chisnell An analytic description of converging shock waves 357

BOOK REVIEWS

Water Waves Generated by Underwater Explosion, by B. LeMéhauté & S. Wang 376

SHORT NOTICES 377

INDEX TO VOLUME 354 379

SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS 380
